University of Engineering and Technology Taxila
Department of Software Engineering (FT&IE)

FINAL YEAR PROJECT REGISTRATION FORM

Session: 2K21

Project Title: MediGenius

Project Description:

1. **Mental Health**: In today's era, one of the many significant challenges the world faces is mental health. The urgency to address mental health disorders using advanced technologies is more pronounced than ever. Our project aims to leverage technology to provide therapy and counselling to individuals in need. While numerous existing systems rely primarily on text-based communication, there are relatively few systems that offer voice-based communication for counselling
2. **Diagnose Disease**
   - Utilizes machine learning algorithms to analyze symptoms.
   - Provides accurate and quick preliminary diagnoses.
3. **Recommendation System**
   - Suggests treatment plans based on diagnosis.
   - Recommends lifestyle changes and preventive measures.
   - Personalizes suggestions according to user medical history and preferences.
4. **Chat Bot**
   - Offers 24/7 support for answering health-related queries.
   - Engages in interactive conversations to gather symptom details.
   - Directs users to relevant resources and schedules appointments.
5. **Recognition System for X-ray**
   - Analyzes X-ray images to detect abnormalities.
   - Assists in identifying fractures, infections, and other conditions.
   - Enhances diagnostic accuracy and speed.
6. **Brain Tumor Recognition**
   - Utilizes advanced imaging techniques to detect brain tumors.
   - Provides detailed analysis of tumor size, location, and type.
   - Supports early detection and improves treatment planning.

Similarly, recognition for **CT Scan** and **MRI**.

Group Members:

Sr. No.	Registration No.	Name	Signature
1	21-SE-19	Ali Usman	
2	21-SE-38	Muhammad Ammar Mubashir	
3	21-SE-48	Syed Moazam Ali Shah	

SUPERVISOR:

Name: Dr Madiha Liaquat
